PROFESSIONAL SUMMARY

Motivated B.Tech Artificial Intelligence & Data Science undergraduate (CGPA: 8.19) with hands-on internship experience in Python, OpenCV, and Full Stack Web Development. Skilled in building real-world applications — from computer vision systems to web platforms — and adept at applying machine learning concepts to practical challenges. Actively seeking internship opportunities in AI, Data Science, Machine Learning, or Software Development with forward-looking organizations such as TCS, Infosys, Zoho, Accenture, and product-based companies.

TECHNICAL SKILLS

Python	Java	C Programming
HTML / CSS	JavaScript	MySQL
Pandas	NumPy	Matplotlib
OpenCV	Machine Learning	Data Analytics
GitHub	VS Code	Problem Solving

INTERNSHIP EXPERIENCE

Python with AI Intern

2024 | Internship

Gained practical exposure to Python programming, AI fundamentals, and computer vision techniques.

- Developed a real-time Face and Eye Detection System using Python and OpenCV with Haar Cascade classifiers.
- Applied image processing operations — blurring, thresholding, edge detection, and object recognition — on live feeds.
- Built a Plant Bacteria Detection System using image enhancement and feature extraction techniques.
- Strengthened analytical and problem-solving skills through hands-on implementation of AI concepts.

Full Stack Web Development Intern

2024 | Internship

Acquired end-to-end web development skills covering front-end design, back-end logic, and database integration.

- Developed a Placement Cell Management System to digitize and streamline student recruitment records using HTML, CSS, JS, and MySQL.
- Built PitchPal, a collaborative web platform enabling startup founders to present ideas and attract collaborators.
- Improved proficiency in teamwork, communication, and Agile-style iterative project development.

PROJECTS

Mall Customer Segmentation using K-Means Clustering

Python | Pandas | Matplotlib | Scikit-Learn

- Performed EDA and data cleaning on customer dataset; applied K-Means clustering to identify 5 distinct customer segments.
- Generated actionable business insights through data visualization, improving targeting strategy understanding.

Face and Eye Detection System

Python | OpenCV

- Built a real-time detection application using Haar Cascade classifiers achieving accurate face and eye tracking.

Plant Bacteria Detection System

Python | OpenCV

- Developed a computer-vision-based disease detection tool using image enhancement and feature extraction on plant leaf images.

Placement Cell Management System

HTML | CSS | JavaScript | MySQL

- Designed and deployed a web platform managing placement records for 100+ students, improving recruiter accessibility.

PitchPal — Startup Support Platform

HTML | CSS | JavaScript

- Created a web-based collaboration tool for startup idea presentation, used during internship demo day.

EDUCATION

Bachelor of Technology — Artificial Intelligence & Data Science

2024 – 2028

SNS College of Technology, Coimbatore | CGPA: 8.19 / 10.0

LANGUAGES

Tamil — Fluent
English — Fluent
French — Basic (Reading & Writing)

STRENGTHS

Analytical Thinking • Problem Solving
Team Collaboration • Adaptability
Quick Learning • Communication Skills
